DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a dual band linear antenna array comprising four elongate metal plates arranged to form a rectangular array, a first opposing pair of the metal plates is longer than a second opposing pair of the metal plates, wherein the length of the first opposing pair of the metal plates is one quarter wavelength of a first electric wave, and the length of the second opposing pair of the metal plates is one quarter wavelength of a second electric wave, and the first electric wave has a frequency lower than that of the second electric wave.

Claim 8 recites a dual band linear antenna array comprising three elongate metal plates arranged to form an open rectangular array, one of the metal plates is longer than the other two metal plates, wherein the length of the longer metal plate is one quarter wavelength of a first electric wave, and the length of the other two metal plates is one quarter wavelength of a second electric wave, and the first electric wave has a frequency lower than that of the second electric wave.

None of the prior arts shows or suggests this dual band antenna.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2821

2. The patents to Zimmerman, Engargiola et al, Gottl, and Reece et al are cited as of interest showing the antenna device similar to that disclosed.
